# Industry Overview

The growth of digital content sales over the years is on an unprecedented rate and is expected to develop at an even higher rate in the years to come. This growth is attributed to blockchain technological developments and increasing internet penetration. In the Centralised Exchange concept, all the wallet is connected to the central system, and wallet's real amount is controlled by central. Due to this structure more coin can make from central, it means no transparency but here in Buyzone, we don't have wallet to control the assets that reason nobody can steal information, and provides 100% transparency.

## Centralised Platform :

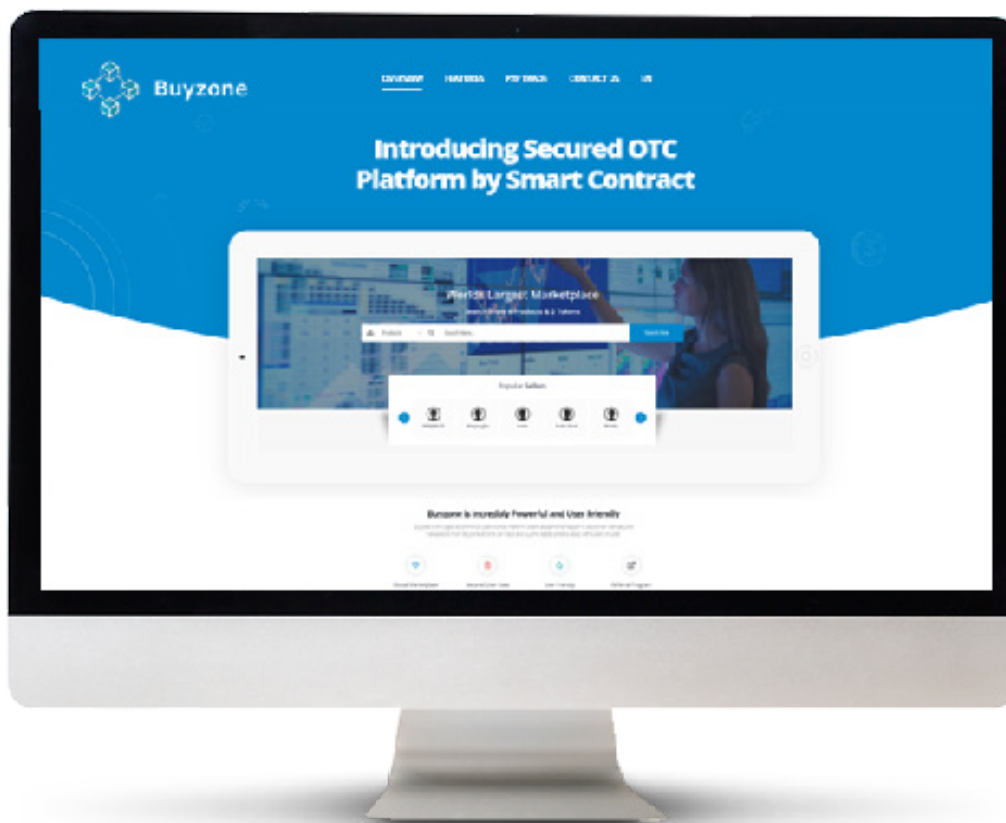

- Pegging Asset, but can make more asset
- Keep in Real Asset at their Cold wallet

## Buyzone Platform :

- 100% Decentralised Platform
- Buyzone does has not any wallet. So can't make any fake asset
- All transaction are 100% Transparency with Etherscan.

With this growth, Buyzone aims to tap-into this growth and create tremendous benefits for users through excellent user friendly sales and trading experience. However, digital trading is faced with varied challenges that range from lack of guarantee on the digital items and merchants, security and privacy of customers. All these challenges have created widespread limitations on the e-commerce platform all over the globe.

Hence, Buyzone ECommerce platform aims to provide decentralized 100% P2P platform for customers with a more convenient online purchasing experience that will enable buyers to enjoy a more affordable quality digital product and token sales. Buyzone platform is committed to providing the customers' with remarkable and exclusive purchasing experience. We aim to create a community-based marketplace powered by blockchain that will encourage all members to participate towards the productivity of the community.

<https://buyzone.io/>

## Vision

Our vision is to build the world's first leading decentralised P2P platform that is powered by Ethereum blockchain, focused on ensuring amazing trading experience and to provide access to affordable digital items and token sales. Buyzone aims to build a strong community-based marketplace that enables members' to purchase digital items and to trade ERC20 coins on the platform.

## Mission

Buyzone is the Digital eCommerce Open Market Platform for global users to experience P2P trading and to make the world a better place for Blockchain Technology. In our platform we allow customers to trade digital assets through smart contracts in the blockchain on various business fields. Our mission is to elevate the user's experience by working to provide customers with an exceptional and amazing trading and sales experience that is focused on granting them access to affordable digital items. Thus, by adopting the most disruptive technologies in recent years, we aim to build a strong community where all members will be encouraged to contribute to the general productivity of the platform. This will be done by enhancing interaction between users, helping them in decision making and building a personalized trading and transaction experience. Buyzone provides a fast and secure ETH payment with all the transactions recorded on the blockchain etherscan.

# Technology

## Why Ethereum Blockchain Technology ?

Ether is a cryptocurrency whose blockchain is produced by the Ethereum platform. Ether can be exchanged amongst records and used to repay member digging hubs for calculations performed. Ethereum gives a decentralized virtual machine, the Ethereum Virtual Machine (EVM), which can execute contents utilizing a worldwide network of public hubs. EVM (Ethereum Virtual Machine) bytecode, which is subsequently sent to the Ethereum blockchain for implementation. It uses a smart contract which is a high-level programming abstraction that is brought together on the virtual machine. Ethereum's smart contracts are based on varied computer language, which programmers use to code their own functionalities to suit their needs.

Buyzone is designed as a digital ecommerce open market platform that allows unit of payment between sellers and users, based on Ethereum protocol of decentralized application. The E-commerce platform allows anyone anywhere to buy digital content effortlessly with secured user data on a user friendly platform.

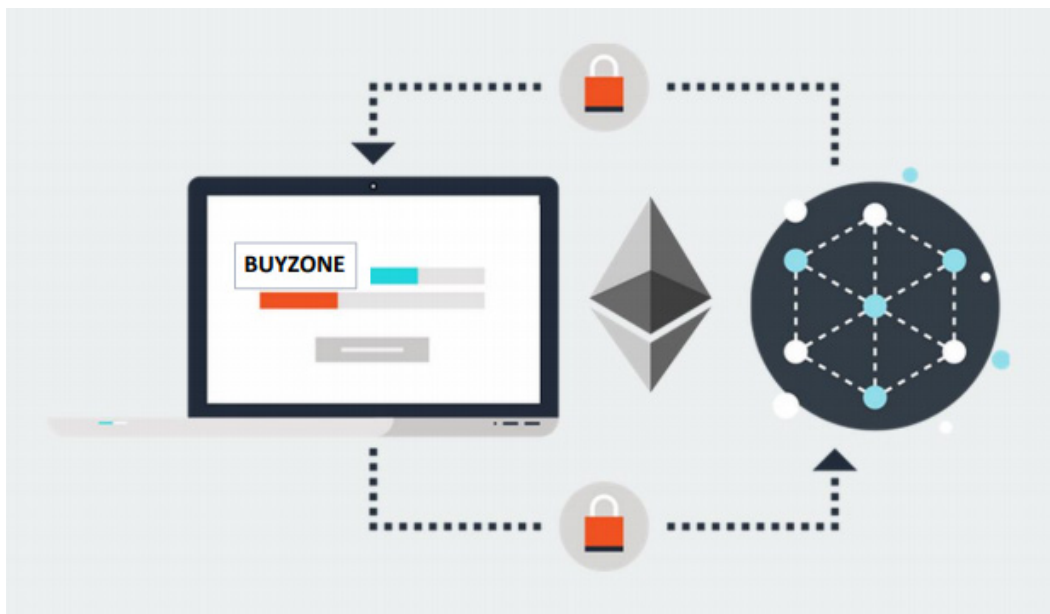

This basic unique feature is based on Ethereum Smart Contracts with a couple of answers for a faster layer, over that, it allows for faster transaction process among users. The referral program is worked in an approach to encourage the whole connection between seller, and buyers.

## Smart contracts and Ethereum

Smart contracts are immutable programs that execute when certain conditions are met. They are a piece of code set up on Ethereum virtual machine (EVM) which contains the terms of the agreement involving buyer and seller. In other words, they are lines of code and agreements enclosed therein that exist across a decentralized distributed blockchain network. Smart contracts allow trusted transactions and contracts to be established among diverse unspecified parties without the need for a central authority. Smart contracts are much preferable to the traditional channels because smart contracts can be verified quickly and cheaply and are fully transparent.

Buyzone uses ERC20 smart contract method to keep track of consumer's payment system and expedite their transaction processes. The smart contract ensures proper allocation of proceeds among users. ERC-20 tokens are blockchain based assets that have value, which could be sent and received using the Ethereum network. The ERC-20 allows users to easily and seamlessly make transactions with the Ethereum network without the need to set up their own Blockchain.

Buyzone uses ethereum smart contract method to keep track of user's payment system and expedite their transaction processes. The smart contract ensures proper allocation of proceeds among users. All the transactions are recorded on smart contract. Users can buy and sell their digital products and sell ERC20 through smart contracts instantly.

# Benefits of Buyzone Platform

## Decentralized P2P

Buyzone platform operates on a 100% decentralized P2P platform where all transactions in smart contracts are traded safely on a secure network, without any interference.

## Digital Content Sales

We understand that people devote a lot of time searching online to find the digital product and the deal that suits their needs and desire, but even the most persistent ones cannot check all the online store offers. Users are never certain whether they found the best possible deal.

Buyzone platform is designed towards creating a user-friendly environment that utilizes smart contracts that allows instant transactions with no required deposit. In Buyzone, all the ETH payments happen in blockchain with secured transactions. It is a multi vendor site, where all the digital goods can be sold with an open market, so anyone in the world can register and sell the digital contents globally.

## Buy / Sell Tokens (ERC20)

Any seller can add their own ERC20 standard token from the public Ethereum blockchain and can set the price for selling, and do an advertisement similar to Digital contents sales. Interested buyers can search from the list through the name of the ERC20 they want to buy, and can chat with the seller for any possibility of negotiation. If buyers and sellers agree on their conditions, the buyer can pay through ETH, and after successful payment, the ERC20 will be released from the seller's system wallet and transferred to the buyer.

## Seller side Commissions

Usually in all other ecommerce websites, platforms decide the commission taken from the transaction. Buy here in Buyzone sellers decide the commission like how much percentage the seller is willing to share with the platform, so based on that platform will receive commission. Buyzone makes priority for sellers and buyers who use their platform.

### **Buyzone Referral Program**

The Buyzone Mall Referral Program provides authorized distributors with a platform to receive dividends from their sales. Distributors can receive rewards by selling ERC20 tokens or digital content and services. The overall recommended revenue status is displayed on the user dashboard, and you can apply for ETH withdrawal. When a withdrawal request is made, a reward is paid by the admin on the last day of each month.

### **Security (Privacy Centric)**

Online stores often require buyers' to disclose personal data with every store where they want to place an order. Their every move on the store's website is also being monitored. This means that stores are collecting extensive behavioral data about each user and can connect that data directly to the person.

Buyzone is a privacy-centric platform that understands the significance of user privacy and protects user data for maximum security. We create a secure decentralized platform that enables buyers to enjoy a great trading experience without compromising their personal information to the general public.

### **Trade in Peer-to-Peer (P2P)**

Any users can trade via P2P in the digital assets or ERC 20 tokens by purchase or sale with wallet. the main advantage of this P2P platform is buyer will receive the digital products, seller will receive the product cost and admin will receive the commission at the same time of purchase confirmation.

### **Easy to connect with site.**

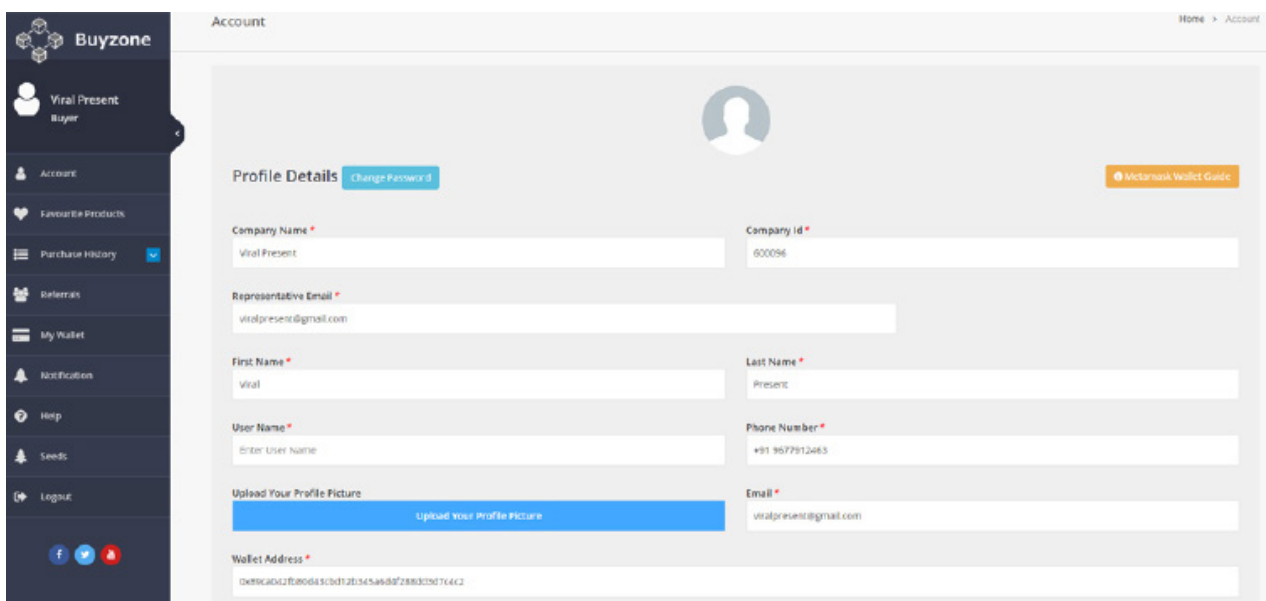

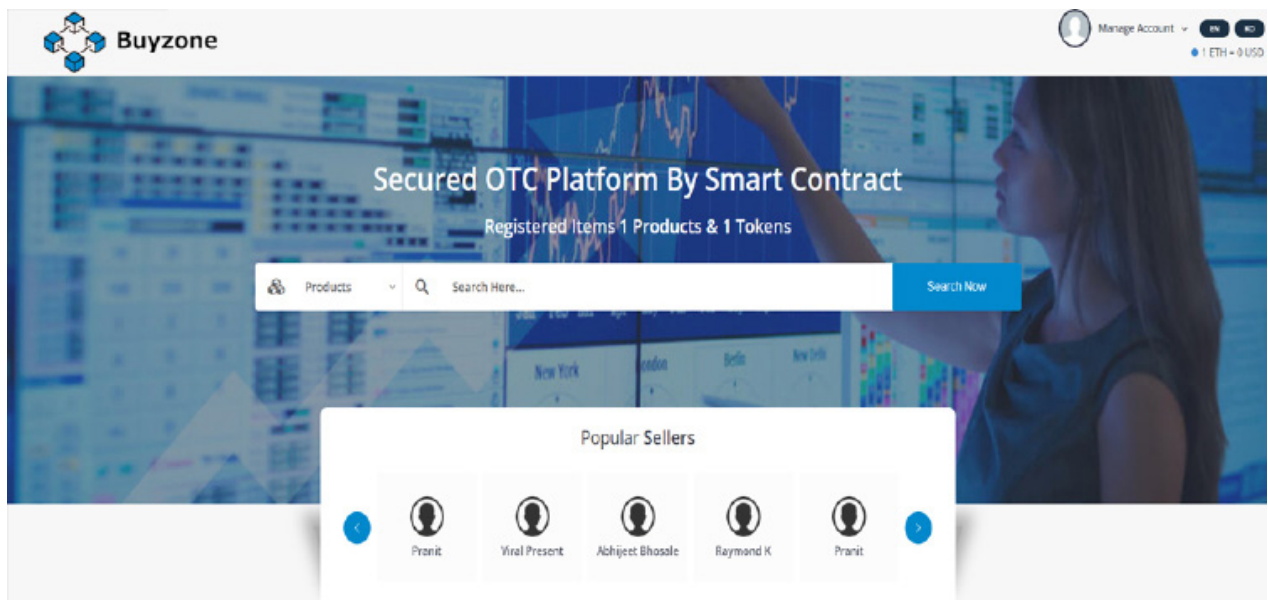

Buyzone does not provide a separate wallet like a centralized exchange, but connects wallets users with Metamask, and all transactions are automatically recorded to the smart contract instantly. Buyzone platform offers one of the most secure transactions and protects all data of platform users from intruder hackings.

# How Buyzone site works?

## Buyer's Side

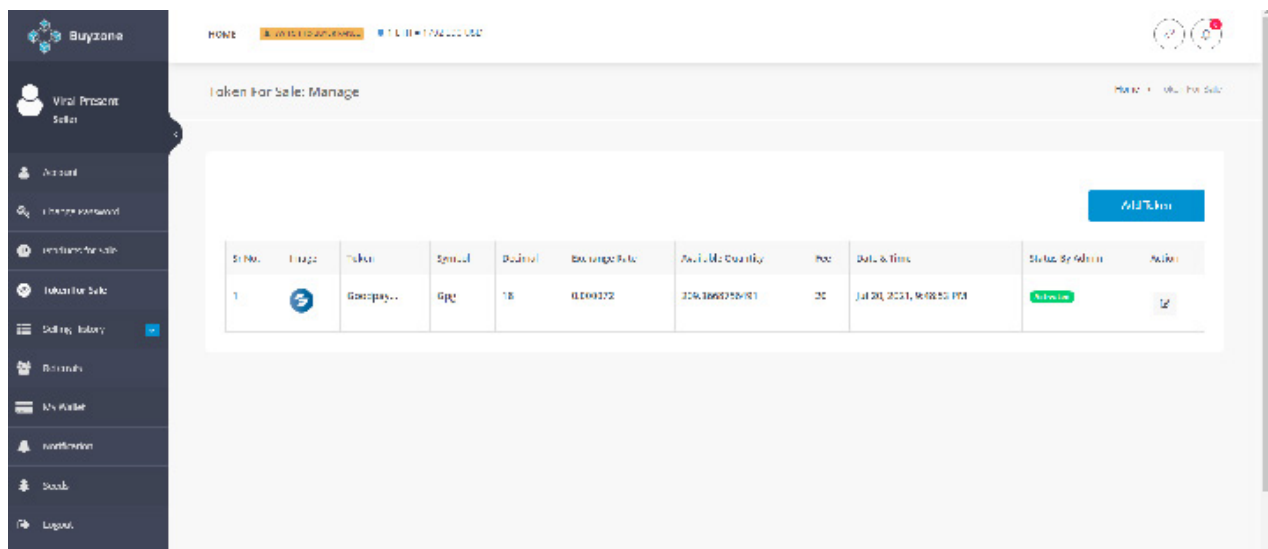

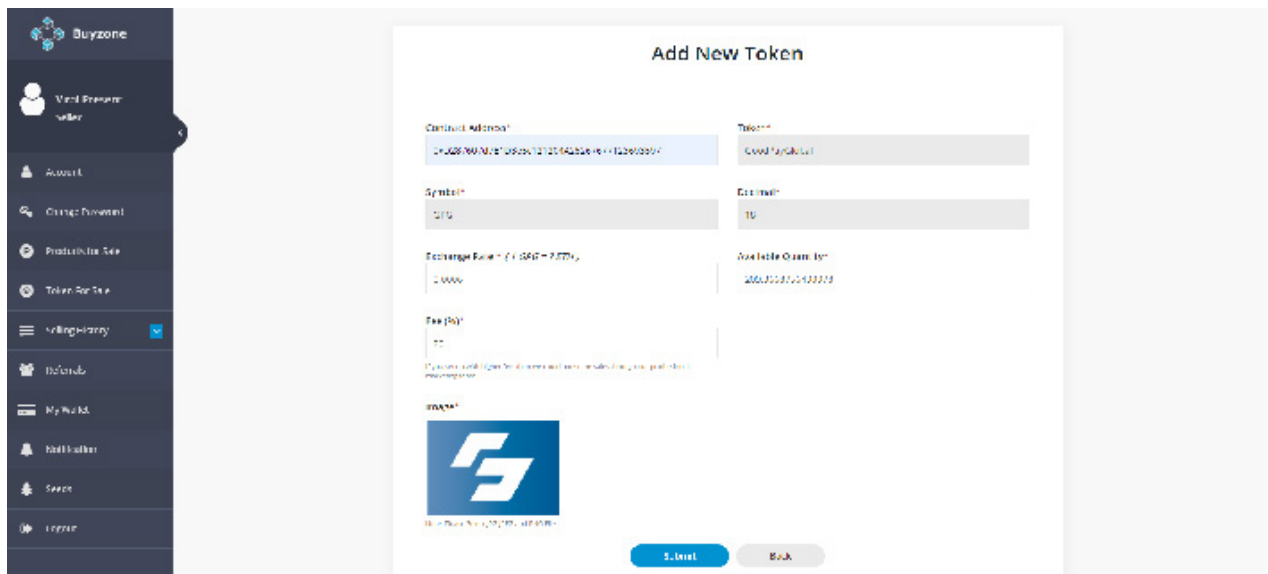

Buyzone platform is a simple way for the buyers to achieve a great buying experience thereby using Ethereum (ETH) as means of transaction. Interested buyers can search from the list through the name of the ERC20 or Digital products they want to buy. If buyers and sellers agree on their conditions, the buyer can pay through ETH, and after successful payment, the ERC20 will be released from the seller's system wallet and transferred to the buyer.

In Buyer Panel, all the buyer profile details can be seen in buyer dashboard with purchase history.

## Seller Side

Sellers of buyzone site provide commissions set up, like how much can be set up in the platform, based on that each digital product and token sales can be added. Our platform is built to enhance sales opportunities for sellers alike in a well organised decentralised digital e-commerce that engages more buyers, and all transactions can be traced.

# Features of Buyzone OTC Market

- Buyzone is the 100% decentralized P2P platform where all transactions in smart contracts are automatically traded safely without unnecessary intermediaries
- Any ERC20-based coin can be registered, sold at the desired price, and the price can be changed at any time.
- The reason ICOs and coin sales are illegal in many countries is because sales are not transparent. However, on this platform, it is an exchange between Ethereum and ERC20 Coins, and all the transactions are transparent to Etherscan, so you can be free from this issue.
- The base point is to generate the initial price when issuing foundation coins (official price formation can be possible by registering the price on the site).
- While selling coins through multistage or distribution, there is no control over the distribution of coins, but when sold on the platform, the price is transparent and can be maintained.
- If you register as a sole distributor, you can receive up to 70% of the platform fee income as dividends through the approval process.
- Easy to Sell Globally.
- No unnecessary deposit, penalty, or contract process required during OTC transactions. All transactions happened automatically through SmartContract.
- Useful for trading block deal coins and unlisted coins.

# Buyzone Referral Program

Buyzone is a community-driven ecosystem that allows members to get rewarded with Buyzone Mall. Referral Program by participating on the platform. We consider participants loyalty and engagement as the key to our success. The Buyzone Mall Referral Program provides authorized distributors with a platform to receive dividends from their sales. Distributors can receive rewards by selling ERC20 tokens or digital content and services. The overall recommended revenue status is displayed on the user dashboard, and you can apply for ETH withdrawal. When a withdrawal request is made, a reward is paid by the admin on the last day of each month.

# Token Economics

## BZC ERC-20 Coins

Buyzone Coin has a half-life every two years, and the half-life ends in the 10th year. Every two years, it is listed on a new centralised exchange. The faster the business grows, the faster the number of coins is incinerated.

Buyzone Business generates real revenue through Buyzone platform transaction fees, advertising revenue, and trading algorithm revenue. Based on the proceeds, the coin is incinerated by buying the proceeds from the exchange.

Arithmetically, there are only 1.5 billion left in two years, 750 million left in two years, 3.2.5 billion left in the sixth year, 1125 billion left in the eighth year, and 56,250,000 left in the last decade.

## Token Details

Token Name	Buyzone
Symbol	BZC
Token Supply	3,000,000,000
Token decimal	18
Blockchain	Ethereum
Coin Type	ERC 20

BZC Contract Address : 0x2b41321a1e542aac190f9da1da12e7ac0b8c10b7

## BZCD Stable Token

BZCD (Buyzone Dollar) is a blockchain-based stable token that can be used in the ecosystem. In Buyzone platform BZC Coin Holders will receive dividend of 50% rewards as BZCD every month from platform profits, this BZCD can be used as one of the payment method in Goodpaymall site <https://goodpaymall.com/>

BZCD is a stable coin operated by itself. Unlike BZC Coin, it is a coin issued on its own private blockchain not operated within Ethereum, and does not require a separate gas (fee) like Ethereum. All the transactions of BZCD can be seen in Goodpay Explorer <http://explorer.goodpayglobal.in/>

Since BZCD does not use the Ethereum network, it is fast (1,500 TPS or more), and is a coin without price volatility that is used with cash based on dollar value in various businesses of the Buyzone. However, it is a closed wallet that is not universally available, and is a closed coin that can be used only for making payments in the Goodpay Mall. When the network expands and is used universally in the future by converting to an open wallet based on collateral.

The screenshot displays the Goodpay Explorer interface. At the top, there is a search bar and navigation links for 'Home' and 'Coupons'. Below the search bar, four key statistics are shown in a grid:

- # 2,317** BLOCK HEIGHT (with a cube icon)
- 30,967.08 s** BLOCK TIME (with a sandglass icon)
- 0.00 H/s** NETWORK HASHRATE (with a globe icon)
- 0.00 H** DIFFICULTY (with a puzzle piece icon)

Below these statistics, there are two main sections: 'BLOCKS' and 'TRANSACTIONS'.

**BLOCKS** section shows a list of recent blocks:

Block ID	Age	Mined By	Transactions
2317	20 days, 9 hours ago	Mined by 0x00000000000000000000000000000000...	1 txs

<http://explorer.goodpayglobal.in/>

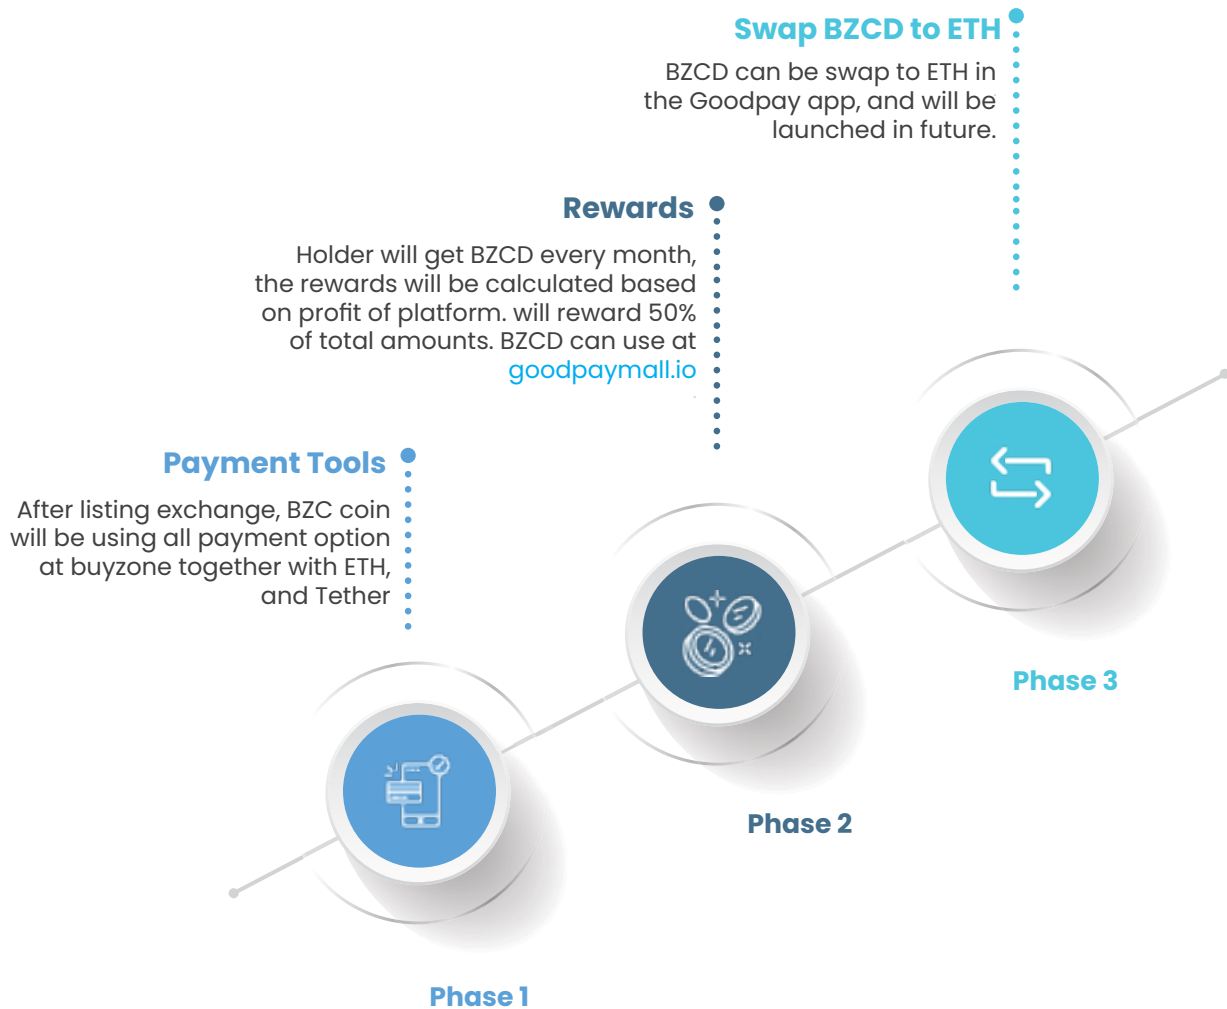

## BZCD CIRCULATION PROCESS

- 1:1 dollar-based value of the collateral value for BZCD stable token.
- BZC Coin Holders will receive a dividend of a total of 50% rewards as BZCD every month from Buyzone platform profits.
- Once BZC Token Holders receive BZCD, they can use it as one of the payments in the Goodpay Mall.
- Once merchants receive BZCD, they can redeem of tokens in order to get real cash.
- In the case of affiliated stores, cash can be received to merchants after taking withdrawal commissions.
- Goodpay Mall is currently joined as one of the affiliated merchant stores under Buyzone.

# Roadmap

## Purchase Token Sales

For the successful purchase of tokens, in this section we will look at how the proceeds from token transactions are divided. When tokens are traded on the platform, the seller is paid in ETH for the tokens sold. Admin and Referrers also receive this fee in ETH, which is set by the seller.

If a basic fee (20% for digital products is set as a basic fee) is required according to a token transaction on the Buyzone platform, 30% of the fee is paid to the Admin and 70% is paid to the Referrer.
